Rules & Scenes

## GET MORE FROM YOUR SMART SECURITY SYSTEM

SCENES

With Scenes, you can trigger a series of actions with the touch of a button. Choose from default scenes like Home or Away, or create your own.

Each Scene can control multiple components of your property, including your intruder system, lights, cameras and the videodoorbell.

> Example: Use the 'Away' Scene to set your security system and turn off/on your lights.
> (Example in image to the right)

Customize your Scenes under Automation in your ADT *Smart Services* online portal: **smartservices.adt.ie**

RULES

Setup rules to automate your home and make life more convenient. Here are just a few ways you can use rules:

- Unset your alarm remotely and turn the lights on
- Turn on lights when you approach the property
- Videodoor bell to record when motion is detected and not just when the door bell is rang

To setup rules, go to Automation, click on Rules, and then Add a Rule.

1. Name your Rule
2. Choose what should trigger the automation
3. Select the device you'd like to automate
4. Set the time-frame
5. Save Rule

You can also set rules for specific devices, like Image Sensor, Videodoor or setup Geo-Services to automate your home based on the location of your smartphone.
